Projects

Ecommerce Website

https://github.com/mehedihasan555552/Ecomerce-website-2021

Web app built with Python, Django, Bootstrap, Html, CSS, JavaScript. This ecommerce web App has PayPal payment System integration. User can buy product without creating account. Users don't need to register and login for them to use the app.

Library Management System

https://github.com/mehedihasan555552/Library-management-system-SWPU-2020

Library Management System is developed in Django, Html, CSS, JavaScript which mainly focuses on basic operations in a library like adding new books, and updating new information, searching books and members, and return books. Purpose: The system is mainly to provide automatic Admin: He can read or write the information. Operator: He can open the account of a member. Scope: The application is wide and can be used.

Seller Website Admin Panel System

https://github.com/mehedihasan555552/Seller-Website-Admin-Panel-System

This is a system for monitoring all things like buy sell and user update, user delete, price update etc. It has three levels of users Admin, Buyer, and the Website Coordinator. Each user has a specific role in the system. buyer have the lowest privilege. I developed this system using Django, CSS, Html

To-do App

https://github.com/mehedihasan555552/Todo-Djagno-ReactJs

This is a simple to-do app I developed for educational purpose. It allows the user to perform CRUD operations adding and removing tasks from the database. A user can see the tasks that he/she have added. I developed this app using Django rest Framework, React Js
